

**Janet has 2 months left to find a matching donor in time! Please register now.**

7000 North Americans are in Need - Only 30% will find a match in time

**www.HelpingJanet.com**

Testing is pain free and consists of 4 cheek swabs  
**ASIAN ETHNICITY DONORS ARE URGENTLY NEEDED**

**About Janet** On August 24, 2009, 22 year old Janet was diagnosed with acute lymphoblastic leukemia, a form of blood cancer. In May of 2010 she attained remission after undergoing extensive chemotherapy. Her remission lasted until Dec. of 2011 when she relapsed. She is now undergoing chemotherapy again in the hopes that she can attain a successful remission and receive a bone marrow transplant. Now comes the daunting task of locating a marrow match from the national or international registries after tests revealed that her only sibling is not a match. It could be you. Processing new donor samples can take up to 2 months or more so it is crucial for people to be tested asap before her need becomes more critical.

### **Join the OneMatch Stem Cell and Marrow Network or Héma-Quebec Stem Cell Registry**

Testing takes 10 minutes (a short form and 4 cheek swabs) and an additional 8-10 weeks for your test to be processed to be added to the national and worldwide registries.. The tissue typing to see if you are a match can take an additional 2-3 months.

**You could be the one to save Janet's life!**

### **Ethnicity is a Key Factor**

There is a crucial need for people of ethnically diverse backgrounds including individuals of African, Asian, Latino, Aboriginal, and Multiethnic origin in the national registry. The simple truth is much less than 30% of patients of these backgrounds find a match without our help.

### **About Being Tested**

- Testing is free
- Testing is painless, just a simple cheek swab
- Donating is relatively pain free as 70% of all stem cell donations are now given through blood collection.
- You must be in good general health
- You must be between 18-50 years of age to register
